go hands-free!

Experience the ease and convenience of hands-free conversations with the AT&T cordless headset. Go farther from the base than with other headsets and enjoy talking longer as a result of the lightweight, comfortable design. The AT&T TL7610 can be connected to any brand of cordless or corded phone, allowing you to receive and make calls from your home or office with the assistance of the AT&T TL7601 dial pad. Also, the AT&T TL7600 cordless headset can be wirelessly paired as another accessory handset to most 2008, 2009, and 2010 AT&T cordless DECT phones and with AT&T Synapse® and SynJ® business phones.

DECT 6.0 Digital Technology

The AT&T DECT 6.0 products offer unsurpassed range performance and sound clarity. This is achieved through a unique antenna design and advances in noise-filtering technology. An independent laboratory has confirmed that AT&T DECT 6.0 products perform up to 45% better in range competitions. Now calls can be taken in the basement, backyard and garage with exceptional sound quality.

Expansion System

Use up to 2 headsets through a single phone jack. This makes the TL7610 ideal for your busy home or small office. (Model TL7600 accessory headset sold separately.)
